Save the Date for Nutrition 2019

DATE AND TIME

06/08/19 6:00am-06/11/19 12:00pm

Mark your calendar now and save the date for [Nutrition 2019](#) – **June 8-11**, Baltimore Convention Center, **Baltimore, Maryland!**

Current Developments in Nutrition Citations Now Appearing in PubMed

We are happy to announce that *Current Developments in Nutrition (CDN)* has been accepted for inclusion in the National Library of Medicine's PubMed Central (PMC). *CDN* articles can now be found in the PMC repository at <https://www.ncbi.nlm.nih.gov/pmc/journals/3465/>. As part of its standard operations, PMC also sends citations to PubMed. Thus, citations and abstracts of *CDN* articles also now appear in PubMed with unique PMIDs.

Input Needed: ASN Vision 2028

Do not miss the opportunity to review the [Vision 2028 Green Paper](#) and [provide input](#) on the future direction of ASN in preparation for our 100th Anniversary. The deadline for comment is August 15, 2018 to keep on track for the Strategic Oversight Committee's charge to provide the VISION 2028 White

Paper to the ASN Board of Directors this fall for review and adoption by year-end. Thank you to those of you who have participated to date. Let your voice be heard!

Policy News

ASN to Comment on FDA Nutrition Innovation Strategy

The Food and Drug Administration (FDA) announced a public meeting entitled "[FDA's Comprehensive, Multi-Year Nutrition Innovation Strategy](#)." The purpose of the public meeting is to give interested persons an opportunity to comment on FDA's nutrition innovation strategy, including: a standard icon or symbol for the claim "healthy"; a more efficient review strategy for evaluating qualified health claims; statements or claims that could facilitate innovation to promote healthful eating patterns; approaches for modernizing standards of identity; possible changes that could

make ingredient information more consumer friendly; and FDA's educational campaign for consumers about the updated Nutrition Facts Label that consumers will be seeing in the marketplace. The meeting will be held **July 26, 2018** from 8:30am-5:30pm ET in Rockville MD. Attendees are encouraged to [register online](#) to attend the meeting in person or via live webcast. Written comments are due **by August 27, 2018**. ASN plans to comment on the FDA Nutrition Innovation Strategy. Please share any input you may have to inform ASN comments with [Sarah Ohlhorst](#).

NutriLink is the ASN members-only community forum. Post discussions, browse resource files, and search for a mentor - all in one place! It is also **home for all RIS and Council communities**. ASN NutriLink is the official way for RIS leaders to communicate deadlines, plan events and share other information specific to the group. Use [this guide](#) to adjust your email frequency. Contact the [ASN NutriLink Community Administrator](#) with any questions.

Call for Letters of Intent

*The National Pork Board is requesting initial Letters of Intent (LOI) to conduct research for 2019 funding in specified areas of interest regarding fresh, lean pork and human nutrition. The specified research and format will be available July 10th, 2018. The initial, 2-page, LOI will be **due to the National Pork Board on August 14th, 2018**. For more information please visit www.pork.org/research.*

Current Issue

Advances in Nutrition (AN)

July 2018, 9(4)

Featured Articles:

- Perspective authored by [Satija et al.](#) argues that large randomized controlled trials aren't feasible in nutrition science. Moreover, these larger trials are unlikely to advance nutrition science nor improve nutrition policies. The authors make the case that there is already strong evidence and consensus among nutritional researchers and practitioners about the basic elements of a healthy diet. [Perspective: Are Large, Simple Trials the Solution for Nutrition Research?](#) *Adv Nutr* 2018 9(4):378-87.
- Researching the Dietary Inflammatory Index and site-specific cancers. [Jayedi et al.](#) find, "The results of this scientific review are consistent with previous findings that indicated that a healthier diet, higher diet quality, eating more fruit and vegetables, and having dietary habits consistent with dietary guidelines were significantly and inversely associated with the risk of different cancer types." [Dietary Inflammatory Index and Site-Specific Cancer Risk: A Systematic Review and Dose-Response Meta-Analysis.](#) *Adv Nutr* 2018 9(4):388-403.

Current Issue

Current Developments in Nutrition (CDN)

July 2018, 2(7)

Featured Article:

- [Teresita González de Cosío et al.](#) documented the Becoming Breastfeeding Friendly process in Mexico. Based on their findings, they strongly recommended raising national awareness on breastfeeding, incorporating the Code of Marketing of Breastmilk Substitutes in Mexican legislation, and extending maternity leave to six months. Moreover, the authors argue for the need to strengthen evidence-based advocacy to secure stable funding and resources for a successful national strategy for the protection, promotion, and support of breastfeeding in Mexico. [Scaling Up Breastfeeding Programs in Mexico: Lessons Learned from the Becoming Breastfeeding Friendly Initiative.](#) *Curr Dev Nutr* 2018 2(6):nyz018.
